PROFESSIONAL EXPERIENCE

Internships

Java Developer intern – OWL AI (March 2026)

- Implemented robust database connectivity and managed object-relational mapping (ORM) using the Hibernate framework within Spring Boot applications.
- Developed and executed comprehensive CRUD (Create, Read, Update, Delete) operations to build scalable user management systems and RESTful backend services.

Cybersecurity Intern – CID Jharkhand Ranchi , Jharkhand (June to July 2025)

- Engaged in hands-on practice with security tools and software applications used by the team.
- Investigated new methods of authentication such as two-factor authentication.
- Analyzed log files for suspicious activities related to cybersecurity events.

Bootcamp

Cryptography and Network Security bootcamp – IIT ISM DHANBAD

- Cryptographic Implementation: Deployed RSA, AES, and Elliptic Curve Cryptography (ECC) algorithms during hardware-focused encryption sessions.
 - Network Defense Tools: Conducted web vulnerability assessments and traffic analysis using Burp Suite, Wireshark, and Kali Linux.
 - Threat Analysis: Performed malware analysis and explored AI/ML security applications through Capture The Flag (CTF) challenges.
-

SKILLS

Languages : C/C++, Python , Java , HTML, CSS, JavaScript

Framework : React, Next.js , Spring boot

Database : SQL, MongoDB

Tools: Git, Docker

Soft Skills: Problem-Solving, Communication, Adaptability, Teamwork

PROJECTS

TribLink: Fair-Trade E-Commerce Platform

- Architected and deployed a full-stack e-commerce solution using React.js and Node.js to connect tribal artisans with digital markets.
- Designed a simplified, high-contrast UI tailored for non-tech-savvy users.
- Integrated secure payment gateways and managed scalable Dockerized deployment.

Spring Boot CRUD Application

- Developed a robust backend user management system utilizing Java and Spring Boot.
- Implemented secure database connectivity and managed object-relational mapping with the Hibernate framework.
- Executed comprehensive Create, Read, Update, and Delete (CRUD) operations for user data.

WhatsApp Chat Analyzer

- Engineered a Python-based data analysis tool equipped with emotion detection capabilities.
- Parsed raw text data from chat logs to evaluate sentiment and identify underlying conversational patterns.

Swipe2Save

- Designed the technical blueprint and developed a gamified financial literacy concept for a hackathon.
- Built an engaging, interactive platform aimed at teaching users responsible financial habits.

EDUCATION

Secondary Education

Adarsh Vidya Mandir 2020-22

BTech in computer science and engineering

Jharkhand University of Technology | 2023 – Present

LANGUAGES

English

Hindi

Bengali
